(Deadline to register without a late fee is October 1, 2010)

Non-members can register beginning August 16, 2010

National
Association of
Steel
Pipe
Distributors

The NASPD will be conducting a Steel Pipe Basic Education Course, immediately followed by an OCTG Specialty Course on October 18-19, 2010. This is an opportunity to get a great overview of the industry in a short period of time as well as a specialization in OCTG if that is of additional interest. You can sign up for one or both courses. All participants will receive either a "Certificate of Attendance" or a "Certificate of Competency". Competency will be measured by an exam given at the end of the second day. In addition to the material found in the NASPD Training Manual, experts in each of the various fields will contribute their knowledge and experience to enhance the program.

The NASPD has met the standards and requirements of the NCEES Registered Continuing Education Providers Program. Participants can earn Continuing Education Credits by taking these courses. Credit earned on completion of this program will be reported to RCEPP. The Steel Pipe Basic Education Course qualifies for 10.0 Professional Development Hours and the OCTG Specialty Course qualifies for 4.0 hours. Hours will be earned regardless of the individual's test results.

The cost of the Steel Pipe Basic Education Course is \$600 for members and \$750 for non-members. This price includes The Fundamentals of Steel Pipe, Tubular Products Manual, breakfast, networking reception, and snacks. The OCTG Course can be taken independently or in conjunction with the Steel Pipe Basic Education Course. The cost of the OCTG Course is \$300 for members and \$350 for non-members (TPM included if not attending the Steel Pipe Basic Education Course). Below you will find the complete program.
